

ARUP BUILDS A MOBILE FIRST FUTURE WITH MOBILEIRON

Key Benefits

- Increase efficiency by continuously moving corporate processes and content onto mobile platforms
- Manage corporate-issues and BYOD devices on a single platform
- Launch and run a corporate mobility program using only existing IT staff, with minimal need for specialized training
- Utilize Apps@Work to make internally developed apps readily available to employees in a branded app storefront
 - Projects on the Go app allows collection of the firm's most common projects and tap pictures to see descriptions of the services
 - World app lets employees tap points on the globe to learn about important projects Arup has completed
 - Inspect app allows consultants to take pictures of a building site with an iPad and drop points of interest onto each picture

ARUP

With MobileIron as our Global MDM platform, we are able to provide a consistent mobile experience for staff in all regions. We have given our engineers a way of making their applications available to our entire organization.
