MobiControl Benefits

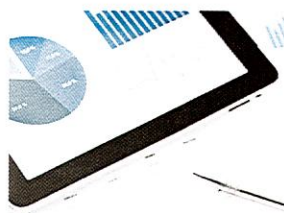

SOTI®

Overview

In the financial industry, access to information is critical. In the right hands, this data enables quick and effective decisions, providing tremendous value to your customers. In the wrong hands, it puts your customers, your business, and your reputation at a tremendous risk. Keeping compliance in a changing regulatory environment, securing and managing enterprise content and applications, and eliminating threats are at the heart of securing enterprise mobility. It is constantly challenged to reach a balance between security and availability of enterprise data and applications. Your mobility management strategy needs to empower your mobile workforce with the data and applications while keeping security and privacy top of mind.

MobiControl for Finance is an enterprise grade mobility management platform that enforces secure use of mobile devices in highly regulated environments. With the MobiControl solution, enterprises can realize the full potential of mobility to make timely and effective decisions, without sacrificing the security and privacy of customer data.

Advanced Security Policies

Secure and protect your valuable data. MobiControl's advanced security policies provide fine grained control over hardware and software features across managed devices. Disable camera/microphone, enforce GPS, and monitor device status in real time. Place restrictions on how data is accessed on the device. Grant and block access to corporate resources. Lock down and wipe lost or stolen devices. With MobiControl, you can rest assured that your data remains in the right hands.

Secure Web Browser

All of the web, without the risk. Prevent unauthorized web browsing through MobiControl's Secure Web Browser. With category based filtering and proxy avoidance protection, you can enforce and control web access to minimize risk. Secure Web Browser replaces the unmanaged browser on the device and works over Wi-Fi, 3G, 4G, and low bandwidth networks to providing a secure web browsing experience.

Location Based Policy Enforcement

Experience a birds-eye view of your mobile deployment. MobiControl's fine-grained geofencing allows you to establish a virtual boundary for location based policy enforcement. Lost or stolen device? No problem. Locate, track and gather information on the movement of your GPS enabled devices, no matter where they are in the world.

iOS SDK for Custom Application Deployment

Best in class application management, built right in. With the iOS SDK, ISVs and enterprise application developers can supercharge iOS applications with powerful MobiControl management functionality for enhanced management, security, and support. MobiControl's iOS SDK provides your line of business applications with available in-app Remote View, File Explorer, 2-Way Chat, Push Messaging, Jailbreak Detection, Device Information, and Location Services capabilities.

Enterprise Application Management

Uniform application deployment across all devices. Enterprise line of business applications are at the heart of the mobility revolution in the enterprise. MobiControl's Application Catalog and advanced Application Management technology provide a secure and easy way to deploy and manage applications through an integrated management console, with a private application storefront for access to enterprise applications and integration with consumer storefronts from Apple, Google, and Microsoft.

Real Time Antivirus and Malware Protection

Lock the door on mobile malware. Quarantine threats in real-time across the device file system and installed applications. Extend desktop grade antivirus and malware protection to your managed devices. MobiControl allows you to remain vigilant against evolving mobile threats.

Content Library

Securely distribute and manage access to digital content. Provide secure access to your valuable content from any managed device. MobiControl's Content Library integrates seamlessly with your existing content infrastructure, providing secure access to digital assets - anytime, anywhere, and over any network, empowering your employees with the data and business workflows that they need to take decisive action.

Compliance and Reporting

Assure compliance across your mobile deployment. Keep your mobile workforce compliant with the regulatory landscape of today, and tomorrow. Assurances of data residency, disclosure, and privacy of data at rest and in transit are at the core of keeping your mobile deployment compliant. MobiControl's extensible logging and reporting engine helps provide a full audit trail of mobile device activity to help your enterprise comply with HIPAA, PCI-DSS, FINRA, and SOX and can be tailored to meet an ever changing regulatory landscape.
